

Izvješće uz aktivnost **A3.2** Naručivanje i prikupljanje satelitskih radarskih snimaka (M07-M09)

Marin Govorčin (suradnik), Ana Kuveždić Divjak (poslijedoktorandica)

Istraživački projekt | IP-01-2018-8944 | GEOMSAT

Istraživanje recentnih regionalnih i lokalnih geodinamičkih procesa na području Republike Hrvatske primjenom suvremenih satelitskih geodetskih metoda

Rezultat **D3.2**: Prikupljene radarske snimke satelitskih misija ERS 1/2, Envisat, Sentinel 1A/B, ALOS-PALSAR 1/2 za šire riječko i dubrovačko područje

Dr. sc. Marin Govorčin (suradnik) prikupio je raspoložive podatke Sentinel-1A/B satelitske misije Europske Svemirske Agencije koji pokrivaju šire riječko i dubrovačko područje. Satelitske snimke prikupljene su preko javno dostupnog kataloga Copernicus Open Access Hub (<https://scihub.copernicus.eu/>). Za svako područje prikupljena su dva skupa podataka koji uključuju silaznu i uzlaznu orbitu Sentinel-1A/B satelita. Korištena je javno dostupna skripta (dhusget.sh, <https://scihub.copernicus.eu/twiki/pub/SciHubUserGuide/BatchScripting/dhusget.sh>) koja omogućuje pretraživanje i skidanje Sentinel-1A/B Level 1-SLC (Single Look Complex) snimaka.

S obzirom na veliku količinu besplatno dostupnih Sentinel snimaka, prikupljanje podataka drugih satelitskih misija pokazalo se suvišnim. Osim toga, podaci satelitske misije ALOS-PALSAR ½ Japanske Svemirske Agencije (JAXA) nisu dostupni besplatno nego uz plaćanje.

- Prilog 1. Popis prikupljenih radarskih snimaka satelitske misije Sentinel 1A/B na riječkom području: (a) uzlazna i (b) silazna orbita
- Prilog 2. Popis prikupljenih radarskih snimaka satelitske misije Sentinel 1A/B na dubrovačkom području: (a) uzlazna i (b) silazna orbita.

Prilog 1. Popis prikupljenih radarskih snimaka satelitske misije Sentinel 1A/B na riječkom području: (a) uzlazna i (b) silazna orbita

(a) Rijeka_Sentinel_ascending.csv
